

Dr. Feher Adriana

attended the

Darkfield Microscopy Course 1/2

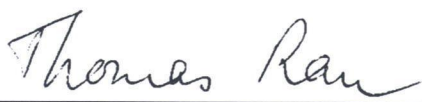

from the seminar cycle Milieu Therapy, Pleomorphism, Isopathy and Darkfield Microscopy, as part of the Certified Education in Biological Medicine. Confirmed by Prof. Thomas Rau, MD, Director of BioMedicine International Education.

Lecturer: Prof. Dr. med. Thomas Rau
Learning hours: 21 hours
Date of Course: March 30 to April 1 2023

Content

- Prerequisites for successful isopathic therapy
- Importance of the milieu - the base therapies, the protein regulation
- Theory of pleomorphism according to Prof. Enderlein and isopathy
- The 3 constitutions in isopathy - theory and practice,
- What does the DF-microscopy contribute to the determination of the patient's therapy?
- Selection of SANUM medication on the basis of milieu diagnostics and DF microscopy
- The 4 categories of Sanumtherapeutica - the systematics:
 - Isopathica / immunobiologica / organic acids / haptens.
 - indications - application - preparations
- Explanation of the range of Sanum medicines and their combination
- Practical part: DF preparations are examined at various microscopes
